Circular waste, processing of Mineral and Organic Biowaste

Do you work in the construction and demolition industry and disposing of waste is a big issue? Are you an innovator in ceramic materials? Are you looking for soil without agricultural soil depletion?

The Research
Module 1
is converting
waste for you!

Our researchers are transforming:

- CDW: Construction and Demolition Waste
- EWQ: Extractive Quarry Waste
- MSWI: Incinerated Municipal and Special Waste
- CMW: Ceramic Material Waste
- OBW: Organic BioWaste

What are they going to obtain?

- Recycled aggregates for road pavements
 - Biofertilizers
 - Artificial substrates as technogenic soils
 - Secondary raw materials for the replacement of virgin raw materials in the field of the so-called Critical Raw Materials.
- ▶ You can discover our results and products through our databases, reports, and a list of pilot sites.
